Location Information					System-Owned Portion			Customer-Owned Portion			tion to Assign Tap
	Location Identifier[x]										
Unique Service Line ID	Street Number[x]	Street Name[x]	City[x]	Other Location Identifier[‡]	System-Owned Portion Service Line Material Classification[x]	If Non-Lead in Column J, Was Material Ever Previously Lead?[‡]	Service Line Installation Date[‡]	Customer-Owned Portion Service Line Material Classification[x]	Service Line Installation Date[‡]	Entire Service Line Material Classification[x]	Sample Site Selection Criteria (Site Tier)
A Unique ID is recommended for each service line.	*Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include a landmark, intersection, block, or other details to specify service line locations. If using GPS coordinates, utilize the GPS Coordinate - Latitude/Longitude fields and include 5 decimal places.*				*Dropdown list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field*	*Select Yes, No, or Don't know. Important for determining if downstream/ customer-owned galvanized service line requires replacement*	*Dropdown list when the service line was installed or replaced*	*Dropdown list includes recommended subclassifications. If non-lead other, describe in Notes field.*	*Date, year, or estimated date range when the service line was installed or replaced*	*Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown*	*Note: This information may be helpful for identifying lead tap monitoring locations.*
